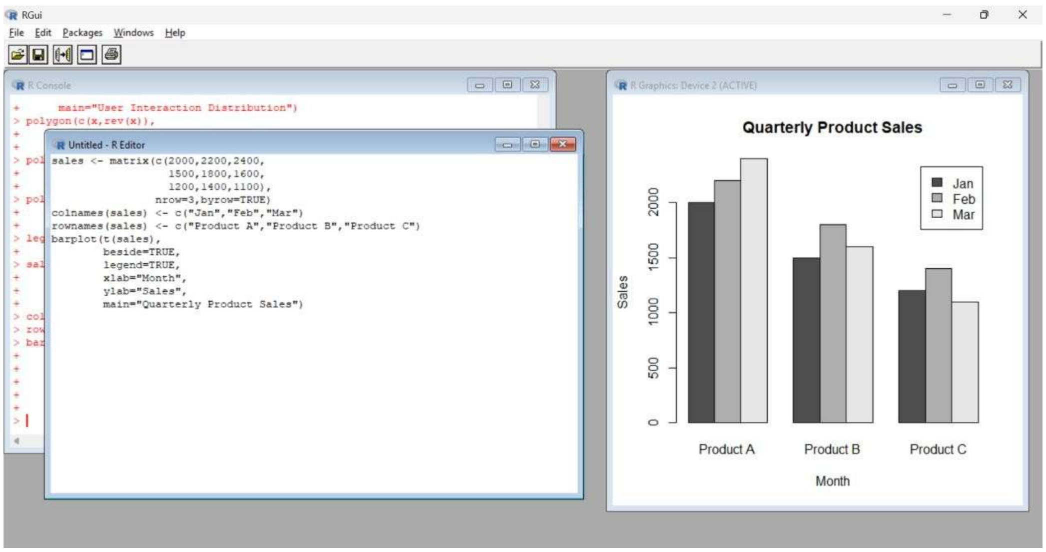
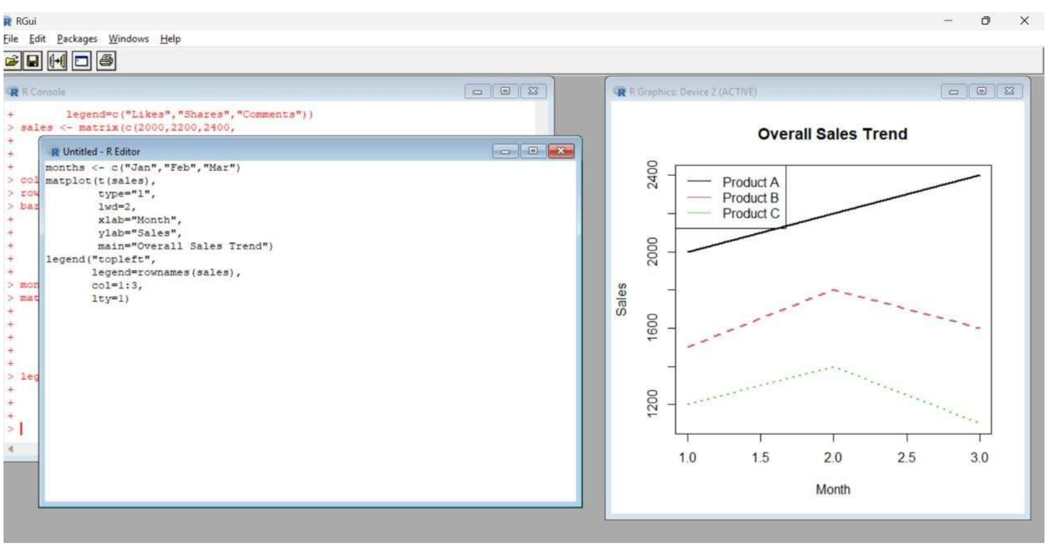
Set 6 : Product Sales Analysis

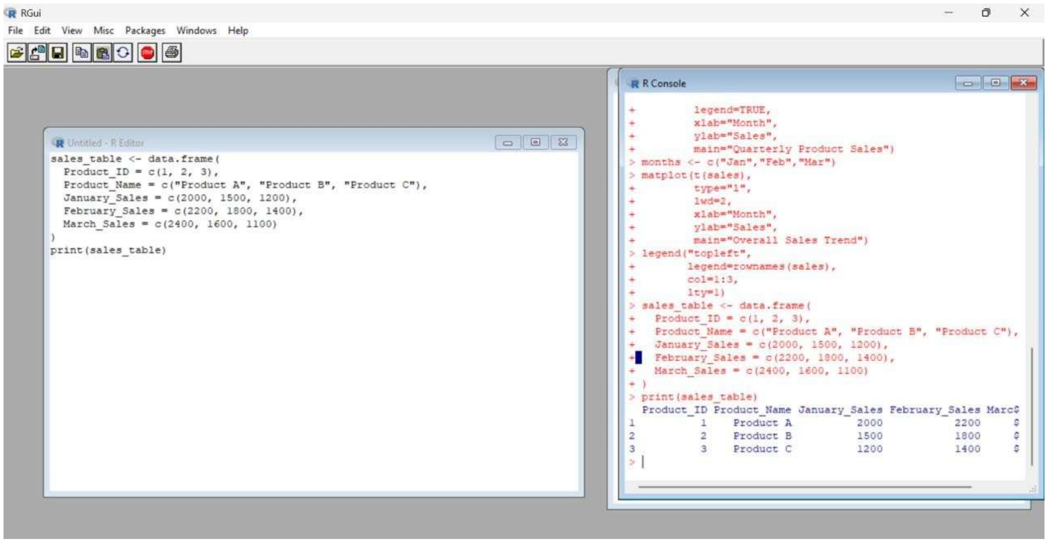
1. Create a grouped bar chart to visualize the sales of each product for the first quarter. Label the chart elements.



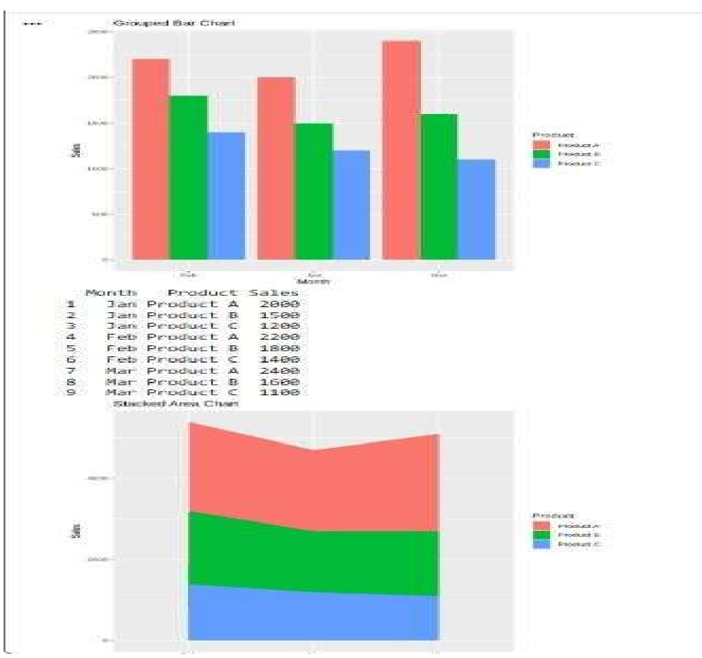
2. Generate a stacked area chart to represent the overall sales trend for all products over the three months.



3. Build a table to show the monthly sales data for each product. Label the table elements.

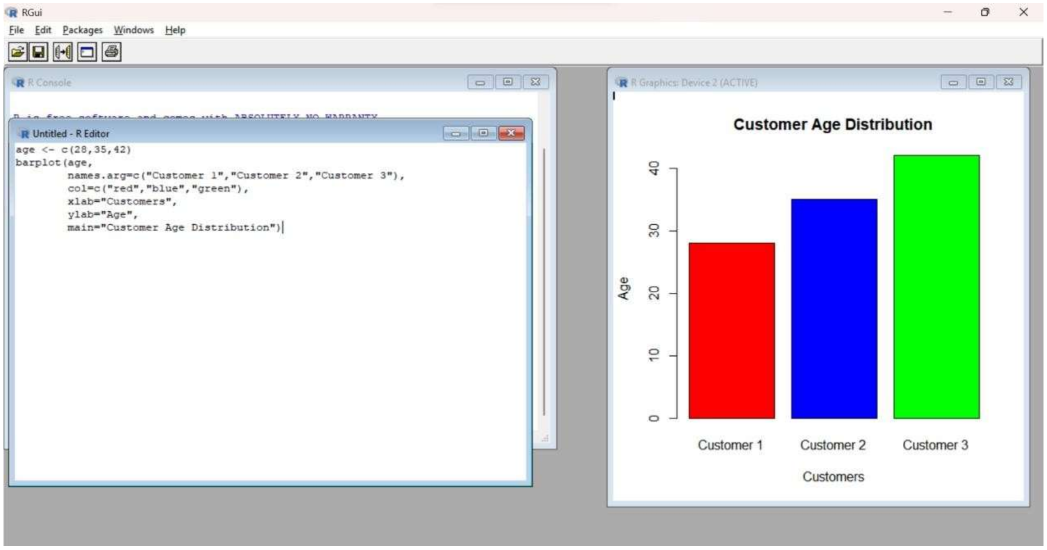


4. Develop a Tableau dashboard combining the grouped bar chart, stacked area chart, and the table for interactive exploration of sales data.

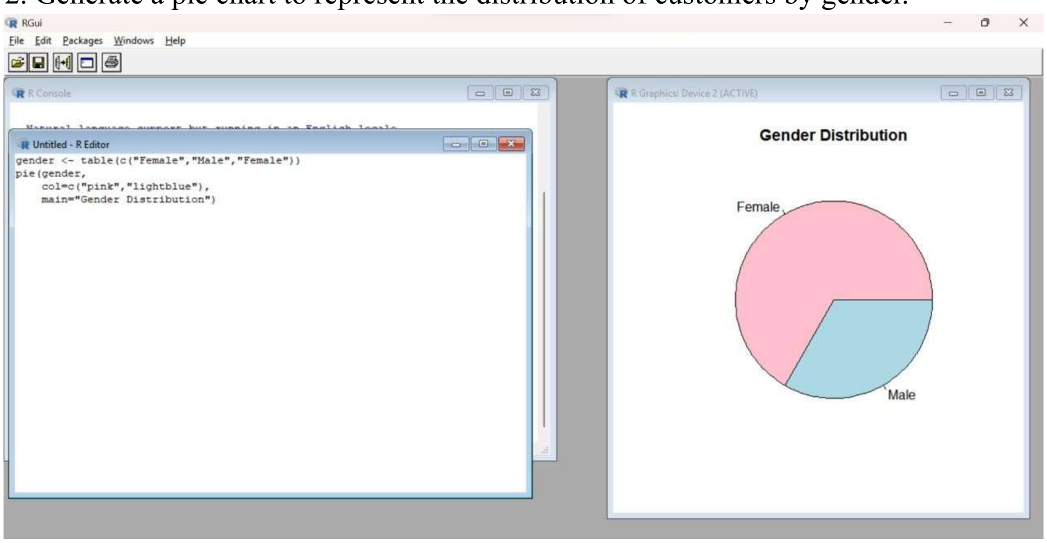


Set 7 Customer Demographics Analysis

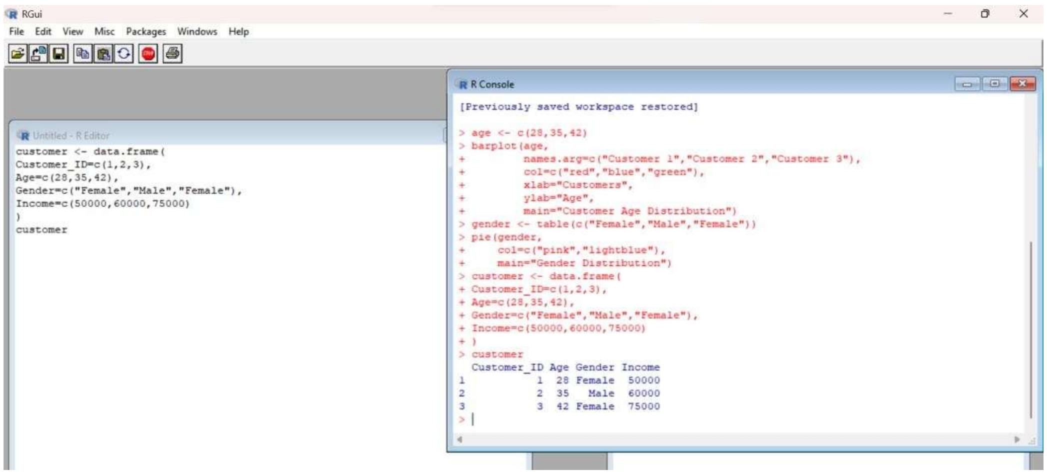
1. Create a bar chart to visualize the distribution of customer ages. Label the axes and title the chart.



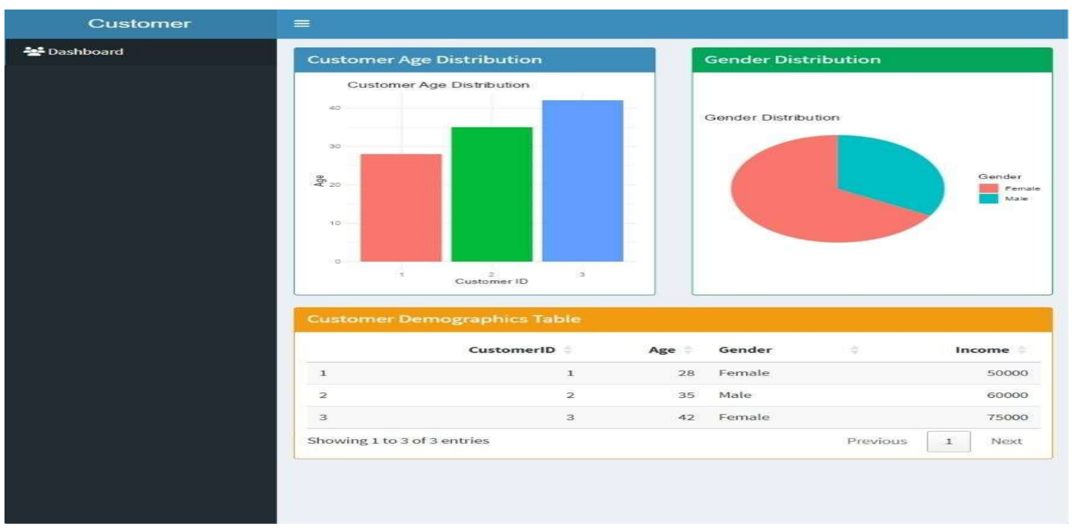
2. Generate a pie chart to represent the distribution of customers by gender.



3. Build a table to show the demographic information for each customer. Label the table elements.

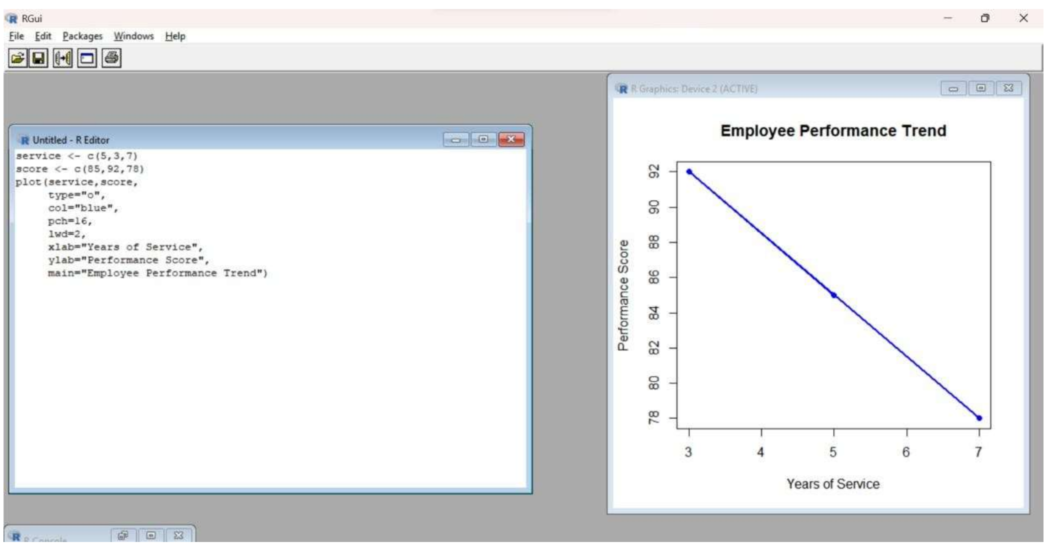


4. Develop a Tableau dashboard combining the bar chart, pie chart, and the table for interactive exploration of customer demographics.



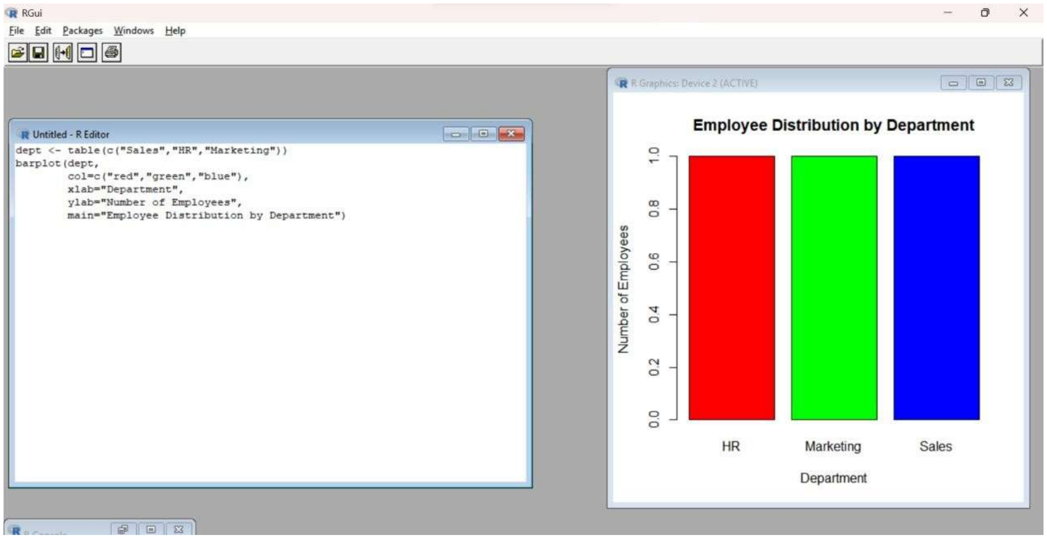
Set 8 Employee Performance Analysis

1. Create a line chart to visualize the performance trend of employees over time. Label the axes and title the chart.

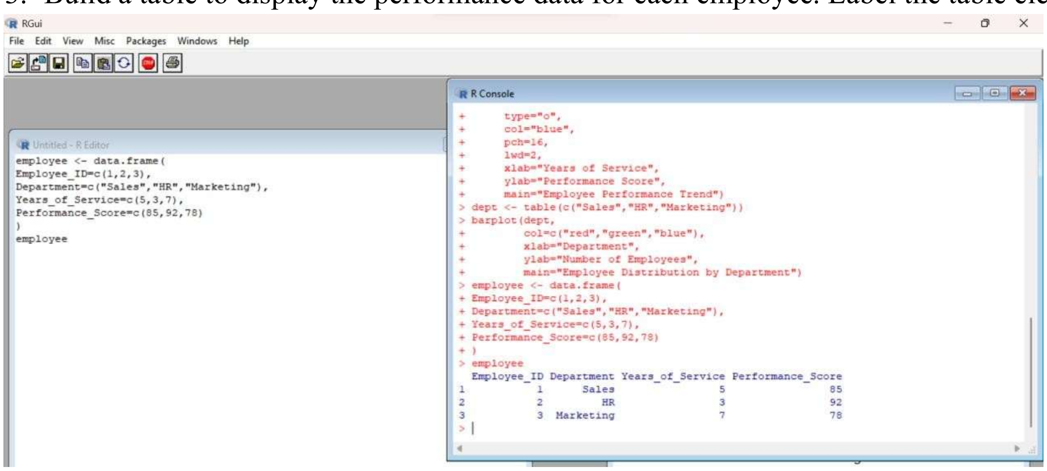


2. Generate a bar chart showing the distribution of employees across different departments.

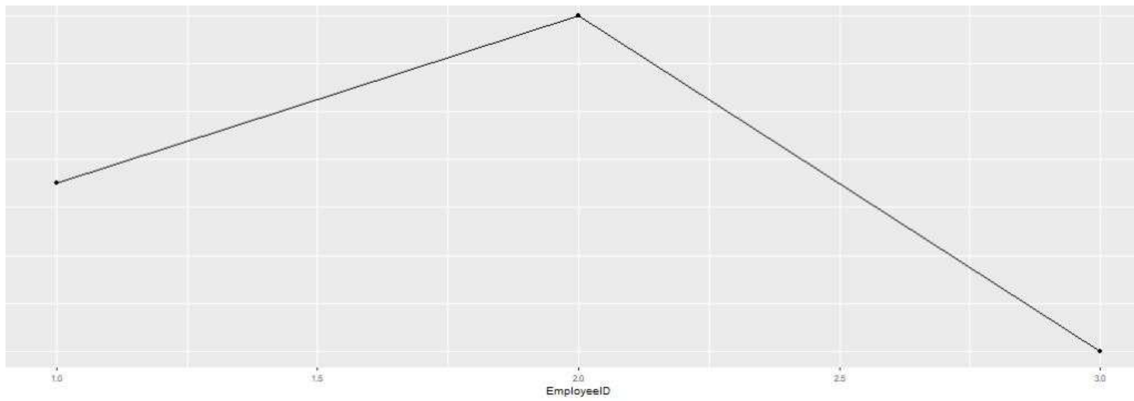
Label the chart elements.

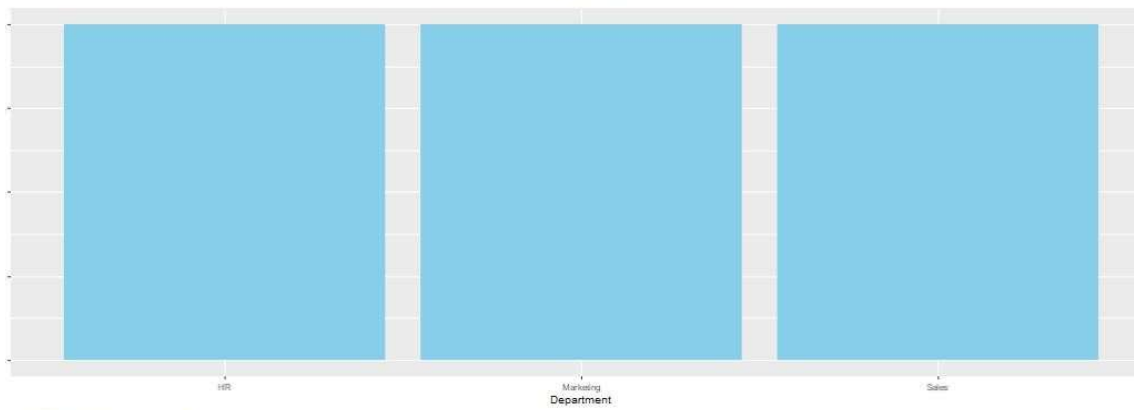


3. Build a table to display the performance data for each employee. Label the table elements.



4. Develop a Tableau dashboard combining the line chart, bar chart, and the table for interactive exploration of employee performance data.

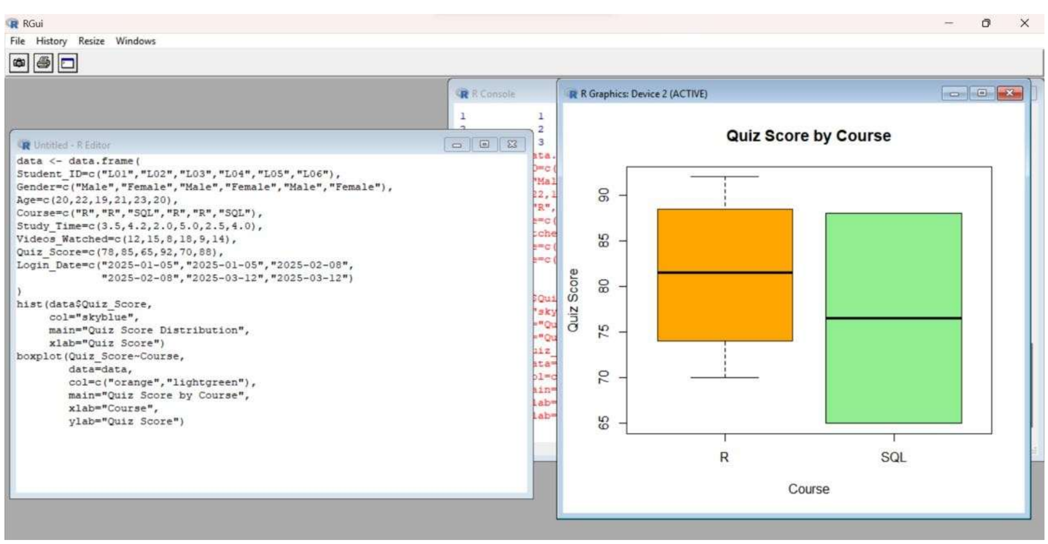




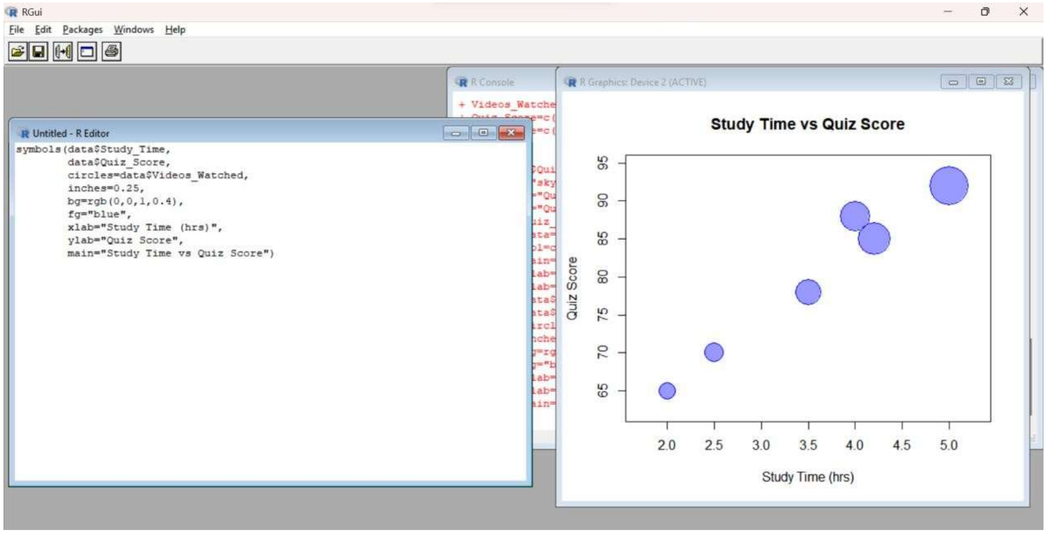
ployeeID	Department	Years	Score
1.00	Sales	5.00	85.00
2.00	HR	3.00	92.00
3.00	Marketing	7.00	78.00

Set 9 Dataset: Online_Learning_Activity.csv

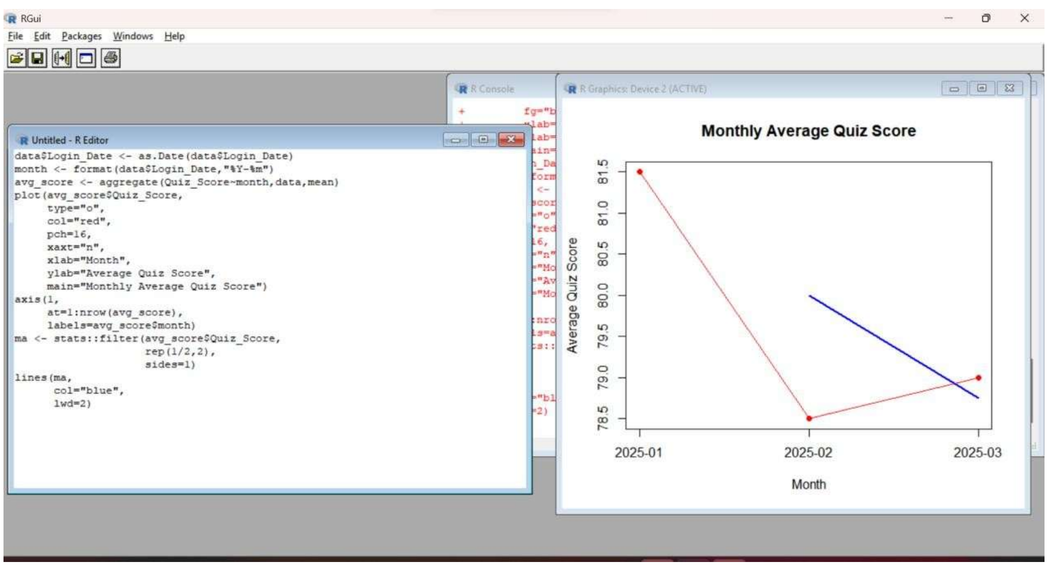
1. Import the dataset in R. Plot a histogram for Quiz_Score. Draw a boxplot of Quiz_Score by Course. Add title and labels. Interpret student performance.



2. Create a scatter plot using R programming between Study_Time and Quiz_Score. Represent Videos_Watched using bubble size. Apply transparency. Explain the learning pattern.



3. Using R programming, convert Login_Date into Date format. Calculate average quiz score per month. Plot a line chart. Apply moving average smoothing. Identify the trend.



4. Import Online_Learning_Activity.csv into Tableau. Create a bar chart showing average quiz score by Course. Create a scatter plot (Study Time vs Quiz Score). Add filter for Gender and Course. Design a mini interactive dashboard.

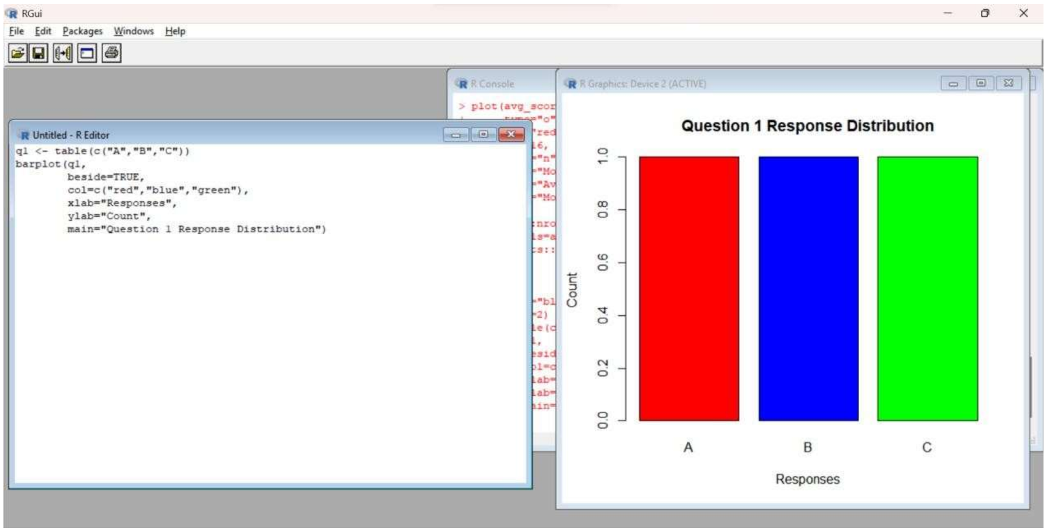
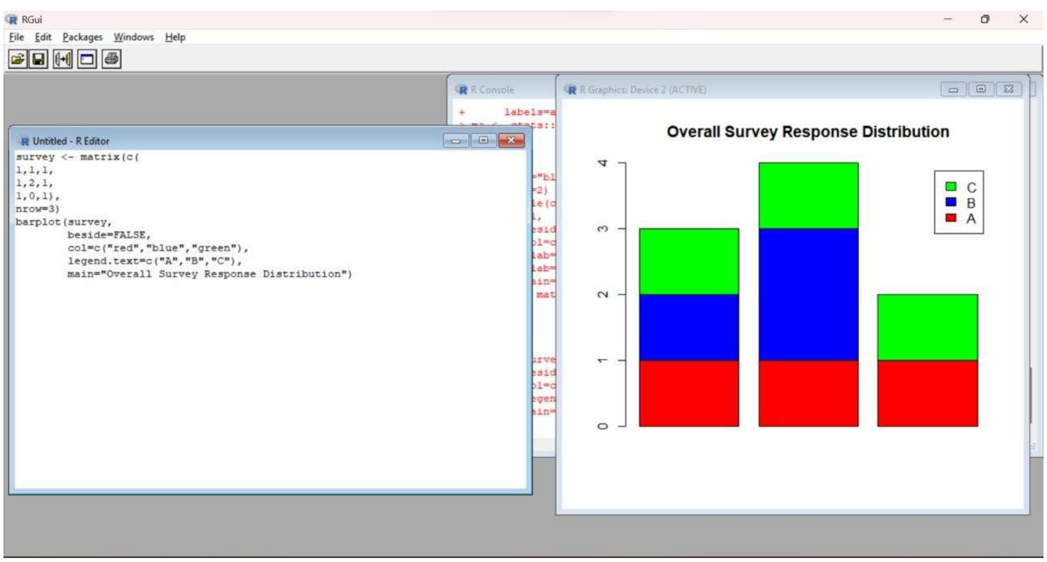
Set 10 Survey Responses Analysis

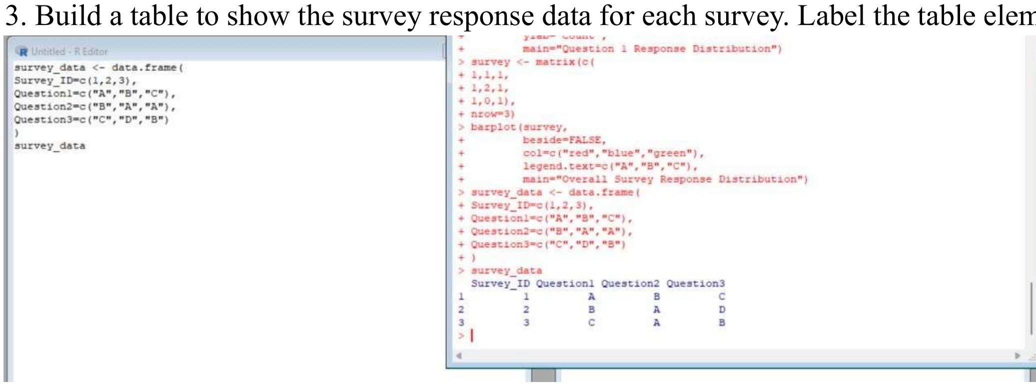
1. Create a grouped bar chart to visualize the distribution of answers for Question 1. Label the chart elements.



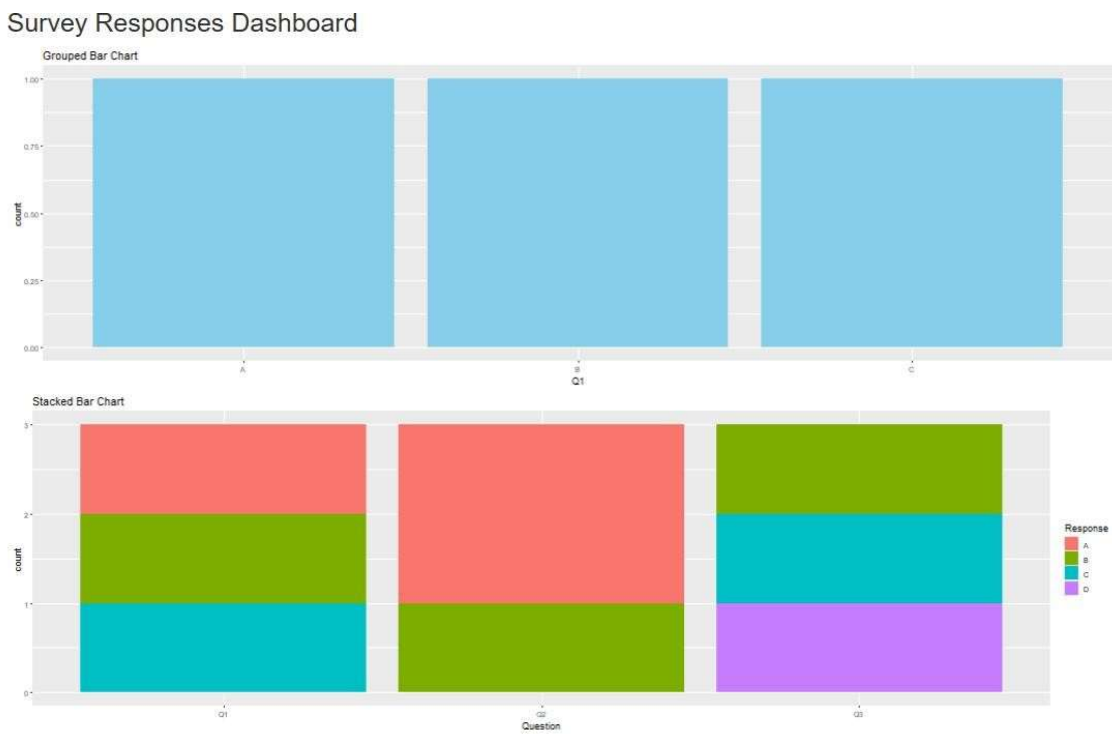
2. Generate a stacked bar chart to represent the overall distribution of responses for all three questions.



3. Build a table to show the survey response data for each survey. Label the table elements.



4. Develop a Tableau dashboard combining the grouped bar chart, stacked bar chart, and the table for interactive exploration of survey responses.



SurveyID	Q1	Q2	Q3
1.00	A	B	C
2.00	B	A	D
3.00	C	A	B
